M4 regression test plan

Manual regression suite for the M4 release (EPIC-019, #263). Every case traces to an `FR-xx` / `A-xx` / `NFR-xx` in `Docs/srs.md`, so a pass is evidence against a requirement rather than an opinion.

- **116 cases** across 17 groups.
- Run each case on **two device/API combinations** (columns A and B below).
- A **Fail always carries a bug number**. Open it with the Bug template and link it as a sub-issue of #272 (`[EPIC-019] T4: Bug bash + fix window`). The full workflow is on #262.

Device matrix (#267)

Fill this in before running anything. Column A is the oldest supported level, column B the newest.

Col	Device / emulator	Android (API)	Build	Signed in as	Tester
A	*e.g. Pixel 4 emulator, Google Play image*	8.0 (API 26)	debug / *commit*	`demo`	
B	*e.g. Pixel 8 emulator*	15 (API 35)	debug / *commit*	`demo`	
C *(optional)*	*physical phone*		release / *commit*	`demo`	

API 26 must use a **Google Play** system image, otherwise Google Sign-In (FR-05) cannot be tested.

How to read a row

- **Pre** — state the app must be in before step 1. `demo` = seeded demo account, `fresh` = empty account.
- **Steps** — numbered actions, `→` between them. Everything needed to reproduce.
- **Expected** — the pass bar. If the observed result differs in any way, it is a Fail.
- **Req** — the requirement this proves.
- **A / B** — enter `P` (pass), `F` (fail) or `-` (not applicable/not run).

Scenario figures used throughout: goal target **LKR 490,000**, already saved **LKR 11,200**, required monthly **LKR 39,900**.

REG-AUTH — Authentication and onboarding (9)

ID	Pre	Steps	Expected	Req	A	B	Bug
REG-AUTH-01	Signed out	1. Register with a new email + password → 2. Submit	Account is created and onboarding opens	FR-01			
REG-AUTH-02	Signed out	1. Register using an email that already exists	A specific error names the duplicate email; the form is not cleared	FR-01			
REG-AUTH-03	Signed out, demo exists	1. Sign in with correct credentials	The dashboard opens directly	FR-02			
REG-AUTH-04	Signed out	1. Sign in with a wrong password	An error shows **and the email field keeps its value**	FR-02			
REG-AUTH-05	Signed in as demo	1. More → Sign out → 2. Inspect the app	Sign-in screen opens, no cached figures visible anywhere	FR-03, A-20			
REG-AUTH-06	Signed in as demo	1. Force-stop the app → 2. Relaunch	Dashboard opens with no sign-in prompt	FR-06			
REG-AUTH-07	Two accounts exist	1. Sign in as demo, note a figure → 2. Sign out → 3. Sign in as fresh	fresh shows none of demo's records	FR-07, CON-15			
REG-AUTH-08	Signed out	1. Register → 2. Skip all three onboarding steps	A working dashboard is reached with empty states, no dead end	FR-08, A-03			
REG-AUTH-09	Signed out, API 26 Play image	1. Tap Google Sign-In → 2. Pick an account	Sign-in succeeds into the same per-user data space	FR-05			

REG-QA — Quick add and categories (12)

ID	Pre	Steps	Expected	Req	A	B	Bug
REG-QA-01	Dashboard, demo	1. Tap the quick-add FAB	Sheet opens in one tap, amount field focused, numeric keypad up	FR-30, A-02			
REG-QA-02	Quick add open	1. Observe the prefilled fields	Date/time = now, account = last used, category = suggestion, type from category	FR-31			

ID	Pre	Steps	Expected	Req	A	B	Bug
REG-QA-03	Quick add open, categories exist	1. Type 450 → 2. Leave the preselected category chip as it is → 3. Save	Saves with no error and no further input; the entry carries the preselected category; Spent rises by 450.00	FR-32, FR-31, A-02			
REG-QA-04	demo has 30 days of history	1. Open quick add → 2. Read the chip order	Chips are ordered by usage over the last 30 days, most-used first	FR-33			
REG-QA-05	Quick add open	1. Enter 0 → 2. Try to save → 3. Enter abc	Save is blocked each time with an inline message	FR-113, CON-13			
REG-QA-06	Quick add open	1. Set the date to last month → 2. Save → 3. Page the dashboard to that month	The entry appears in the back-dated month, not the current one	FR-35, A-03			
REG-QA-07	Quick add open	1. Save with *Save and add another*	A fresh form opens with **date and account unchanged**	FR-36			
REG-QA-08	A saved expense exists	1. Delete it → 2. Tap Undo in the snackbar	The entry and the month totals are restored	FR-37			
REG-QA-09	Goal active (490,000 / 39,900)	1. Save a discretionary expense of 24,000	A neutral message shows the goal cost (≈ % of goal and % of required saving), no guilt wording	FR-41, A-23, NFR-14			
REG-QA-10	Quick add open	1. Type PickMe in the note	Ride-hailing is **suggested as a selected chip**, changeable in one tap, never silently applied	FR-23, FR-25			
REG-QA-11	After REG-QA-10	1. Change the suggestion to another category → 2. Save → 3. Enter PickMe again	The corrected category is suggested this time	FR-24			
REG-QA-12	Every category archived (Categories → archive each one), or a brand-new account before its first sync	1. Open quick add → 2. Type 450 → 3. Save	Save is enabled with no chip selected; the entry saves and is listed as **Uncategorised**; Spent rises by 450.00 and counts as discretionary (Safe to spend falls by 450.00)	FR-32, A-02			

REG-TXN — History, accounts and transfers (10)

ID	Pre	Steps	Expected	Req	A	B	Bug
REG-TXN-01	demo	1. Open the transactions list	Newest first, grouped by day; each row shows type, amount, category/source, account	FR-100, A-08			
REG-TXN-02	demo	1. Filter by type, then account, then date range	Only matching records are listed each time	FR-101			
REG-TXN-03	demo with a "gym" note	1. Search gym	Matching entries are listed	FR-102			
REG-TXN-04	fresh, first sign-in	1. Open any entry form	Five default accounts exist: main bank, secondary bank, cash, Binance, other	FR-10, A-10			
REG-TXN-05	demo	1. Archive an account → 2. Open quick add → 3. Open history	Hidden from the entry form, **history still shows it**	FR-11			
REG-TXN-06	demo, note cash and bank balances	1. Transfer 20,000 cash → bank	Cash falls 20,000, bank rises 20,000	FR-12, A-10			
REG-TXN-07	demo, note month totals	1. Transfer 20,000 between own accounts → 2. Re-read the dashboard	Received, Spent, Saved and the committed/discretionary split are **all unchanged**	FR-61, A-21			
REG-TXN-08	Transfer form open	1. Set the same account as from and to → 2. Save	Rejected with a message	FR-60			
REG-TXN-09	demo	1. Record a deposit into Binance	Treated as a transfer; income and expense do not change	FR-62, A-15			
REG-TXN-10	demo	1. Change a category's committed/discretionary type → 2. Open the split	The split changes without editing any past entry	FR-22, A-18			

REG-INC — Income (7)

ID	Pre	Steps	Expected	Req	A	B	Bug
REG-INC-01	demo	1. Create sources of each type: salary, freelance, AdSense, crypto	All four save with cadence, currency and optional expected amount/day	FR-45, A-06			
REG-INC-02	Salary source with an expected day	1. Open the app on/after the expected day	An expected salary entry exists and is confirmable	FR-49, A-12			
REG-INC-03	After REG-INC-02	1. Confirm with a received amount different from expected	The variance from expected is shown	FR-49			
REG-INC-04	Expected and overdue items exist	1. Read the income total → 2. Read the pending strip	Total counts **received only**; expected/pending/overdue are listed separately	FR-56, A-12			
REG-INC-05	demo with ≥ 3 months of income	1. Open the income summary	Shows this month, a trailing 3-month average and a lowest–highest range	FR-57, A-16			
REG-INC-06	demo with ≥ 1 complete earlier month of income	1. More → Income settings → enter an estimate of 160,000–210,000 → Save → 2. Open Insights and find the estimate card	The card shows the average received over the last up to 3 months beside the estimate (LKR 160,000.00 to LKR 210,000.00 a month) and a neutral below / within / above line; expected or estimated income is not counted in the average	FR-58, A-16			
REG-INC-07	demo, a month with several sources	1. Open income by source	Source amounts **sum exactly** to that month's actual income	FR-59			

REG-FX — Multi-currency and crypto (6)

ID	Pre	Steps	Expected	Req	A	B	Bug
REG-FX-01	Income form	1. Enter USD 10 received as LKR 3,100	Stores USD 10, LKR 3,100 and a derived rate of 310	FR-47, FR-38, A-04			
REG-FX-02	One USD entry at rate 300 exists	1. Note its LKR value → 2. Add a USD entry at rate 320 → 3. Reopen the first	The first entry's LKR value **and** rate are unchanged	FR-48, A-14			

ID	Pre	Steps	Expected	Req	A	B	Bug
REG-FX-03	AdSense source	1. Save a monthly AdSense entry as EXPECTED with an estimate	It is excluded from received income and shown as expected	FR-54, FR-56			
REG-FX-04	After REG-FX-03	1. Confirm it as ACTUAL with the credited amount	It moves into received income with the credited LKR value	FR-54			
REG-FX-05	Crypto source	1. Enter +80,000 → 2. Enter −30,000 → 3. Read the YTD card	Net shows **+50,000**	FR-55, A-15			
REG-FX-06	Goal active, crypto entries exist	1. Toggle "include crypto" in settings	Pace and status recalculate; default state is excluded	FR-83, A-23			

REG-INV — Freelance projects and invoices (5)

ID	Pre	Steps	Expected	Req	A	B	Bug
REG-INV-01	Income screen	1. Create a project with a client, total and three milestones	Saves and lists all three milestones	FR-50, A-13			
REG-INV-02	A milestone due yesterday, unreceived	1. Reopen the app	That milestone shows as **overdue**	FR-51			
REG-INV-03	Overdue milestone	1. Mark it received	An income entry is created, linked to that project and milestone	FR-52			
REG-INV-04	After REG-INV-03	1. Open the created income entry	It names which project and milestone it paid	FR-52			
REG-INV-05	Overdue milestone, notifications allowed	1. Wait for / trigger the reminder → 2. Keep it overdue a second day	Exactly one notification; **not more than once per week**	FR-53			

REG-GOAL — Savings goal (9)

ID	Pre	Steps	Expected	Req	A	B	Bug
REG-GOAL-01	fresh	1. Create a goal: 490,000, deadline 12 months out, linked savings account holding 11,200	Saves and opens the detail screen	FR-75, A-19			
REG-GOAL-02	After REG-GOAL-01	1. Read the required monthly saving	Shows **LKR 39,900**	FR-76, A-01			
REG-GOAL-03	Goal with ≥ 1 complete month	1. Read the goal card	Required and actual pace appear **on the same card**	FR-77			
REG-GOAL-04	Pace 20,000 vs required 39,900	1. Read the status and gap	Status is behind; the LKR-per-month gap is shown	FR-78, A-19			
REG-GOAL-05	Goal with pace ≤ 0	1. Read the projection	Says no projection is available yet — **not a date**	FR-79			
REG-GOAL-06	Goal whose required saving > 40% of average income	1. Open the goal	A banner shows the gap and offers both BR-11 adjustments	FR-81, A-24			
REG-GOAL-07	Goal detail	1. Move the what-if slider to 39,900	Projected date and status preview update and **nothing is saved**	FR-85			
REG-GOAL-08	Goal with a linked savings account	1. Transfer 10,000 into it	Saved rises 10,000; net saving is unchanged	FR-80, A-19			
REG-GOAL-09	Goal active	1. Edit the target → 2. Reopen	Saved progress is kept and the old value is logged	FR-82			

REG-STS — Safe to spend (6)

See Docs/design/safe-to-spend.md for the formula.

ID	Pre	Steps	Expected	Req	A	B	Bug
REG-STS-01	demo, income received this month	1. Read the card → 2. Open the explainer sheet	Amount = received − committed − goal saving − discretionary; the sheet's four parts reconcile to it	A-23, A-19			

ID	Pre	Steps	Expected	Req	A	B	Bug
REG-STS-02	Safe to spend positive	1. Read the card	Shows a per-day figure and the days left in the month	A-23			
REG-STS-03	Month fully used	1. Read the card	Says fully used with the amount over, in **neutral colours — never red**	A-23, NFR-14			
REG-STS-04	Expected salary set, nothing received	1. Read the card	Says waiting for salary rather than a negative figure	A-23, A-12			
REG-STS-05	Current month	1. Page back to a past month	The card is **hidden** on past months	A-23			
REG-STS-06	Card visible	1. Save a new discretionary expense	The figure updates within ~1 s with no manual refresh	FR-96, A-09			

REG-REC — Recurring costs (6)

ID	Pre	Steps	Expected	Req	A	B	Bug
REG-REC-01	Recurring screen	1. Create: Rent, 34,000, monthly, due 1st, committed	Saves as a monthly committed template	FR-65, A-17			
REG-REC-02	A template due today	1. Read the dashboard due strip → 2. Confirm it at 37,500	**37,500** is counted, not 34,000	FR-66, A-22			
REG-REC-03	A template due today, unconfirmed	1. Read the month totals	The unconfirmed amount is **not** counted as spent	FR-66			
REG-REC-04	After REG-REC-02	1. Open that entry in history	Shows expected, actual and the variance	FR-67, A-22			
REG-REC-05	Several active templates	1. Read the recurring list total	Equals the sum of active templates normalised to monthly	FR-68			
REG-REC-06	An active template	1. Pause it → 2. Wait past its due day	No new prompt appears; past instances remain	FR-70, A-17			

REG-INS — Dashboard and insights (11)

ID	Pre	Steps	Expected	Req	A	B	Bug
REG-INS-01	Signed in	1. Observe the first screen after sign-in	The dashboard answers "where do I stand?" with no further navigation	FR-90, A-20			
REG-INS-02	demo	1. Add up the month's records by hand → 2. Compare with the summary card	Received, Spent and Saved match the manual sums	FR-91, A-01			
REG-INS-03	demo	1. Read the committed vs discretionary split	Segments follow BR-13 and **transfers are absent**	FR-93, A-18			
REG-INS-04	demo with a 24,000 coffee and dining month	1. Read the ranked categories	Ranked by total, that category placed accordingly	FR-94, A-18			
REG-INS-05	Dashboard open on another device	1. Save an entry on device 1 → 2. Watch device 2	Totals update within ~1 s with no manual refresh	FR-96, A-09			
REG-INS-06	fresh with exactly one entry	1. Open the dashboard	Meaningful figures, **no "incomplete" or "failed" state, no warnings**	FR-97, A-03			
REG-INS-07	demo	1. Page to the previous month	That month's own totals are shown	FR-98			
REG-INS-08	Any screen	1. Review every screen for streaks, missed-day counters, "incomplete month"	None found anywhere	FR-106, A-03			
REG-INS-09	fresh	1. Open every list and chart	Every one has an empty state and no crash	FR-112, CON-13			
REG-INS-10	No entry for ≥ 7 days	1. Open the app	A neutral welcome-back message with a one-tap catch-up path, no blame wording	FR-105, NFR-14			
REG-INS-11	Insights screen	1. Read the trend and income-by-source charts	Values agree with the month figures; charts render on both API levels	FR-57, FR-59			

REG-NOTIF — Notifications (4)

ID	Pre	Steps	Expected	Req	A	B	Bug
REG-NOTIF-01	fresh, reminder never set	1. Wait a day / check settings	Reminder is **off by default** and nothing is sent	FR-40, A-02			
REG-NOTIF-02	Settings	1. Set the daily reminder 2 minutes ahead → 2. Background the app	One notification arrives at that time	FR-40			
REG-NOTIF-03	API 33+ device	1. Enable a reminder on a fresh install	The runtime notification permission is requested, and denial is handled without a crash	FR-40, CON-13			
REG-NOTIF-04	Notification shown	1. Tap the invoice/digest notification	The app opens on the right screen (see also REG-LOCK-05)	FR-53			

REG-WID — Home-screen widget (5)

Also log widget results under this group for #308.

ID	Pre	Steps	Expected	Req	A	B	Bug
REG-WID-01	demo signed in	1. Add the widget from the launcher	Widget appears; today's spend and safe to spend match the app	A-23			
REG-WID-02	Widget placed	1. Save a new expense in the app	The widget updates within seconds	FR-96			
REG-WID-03	Widget placed	1. Sign out	Widget shows "Sign in to FundTrail" and **no figures**	FR-03, A-20			
REG-WID-04	Widget settings	1. Change opacity, corners and text size → 2. Save	The widget redraws with the chosen look; text stays legible	NFR-15			
REG-WID-05	App lock enabled (#228)	1. Read the widget	Locked state, **no money figures**	A-20			

REG-LOCK — App lock (6)

The full device matrix for the lock lives in Docs/testing/app-lock.md (#307). These are the cross-cutting cases that belong in the regression run.

ID	Pre	Steps	Expected	Req	A	B	Bug
REG-LOCK-01	Screen lock set, app lock on	1. Background > 60 s → 2. Reopen	The lock screen appears and the device credential unlocks it	A-20			
REG-LOCK-02	App lock on	1. Background < 60 s → 2. Reopen	**No** relock	A-20			
REG-LOCK-03	No screen lock set	1. Try to enable the app lock	Refused with "Set a screen lock in phone settings first"; the toggle stays off	A-20			
REG-LOCK-04	App lock on	1. Open Recents → 2. Attempt a screenshot	Recents preview is blank and the screenshot is blocked	A-20, NFR-12			
REG-LOCK-05	App lock on, locked	1. Tap the widget "+ Add" → 2. Unlock	Lock screen first, **then** the quick-add sheet opens	A-20			
REG-LOCK-06	App lock on	1. Sign out → 2. Sign back in	The lock is disabled and its setting cleared	FR-03			

REG-NET — Network and offline (5)

ID	Pre	Steps	Expected	Req	A	B	Bug
REG-NET-01	Signed in, online	1. Airplane mode on → 2. Save an expense of 1,200 → 3. Read the dashboard → 4. Airplane mode off, wait 30 s	Save succeeds, Spent includes 1,200 at once, and the entry reaches Firestore after reconnect	FR-39, A-05			
REG-NET-02	Signed in, online	1. Airplane mode on → 2. Watch the top of the screen → 3. Airplane mode off	Offline banner appears within 5 s and hides when back online	FR-110			
REG-NET-03	Offline with unsynced entries	1. Force-stop the app → 2. Reopen still offline	The entries are still there and still counted	FR-39, A-05			
REG-NET-04	Online	1. Throttle the emulator network to GPRS → 2. Use quick add and the dashboard	No crash, no blank screen; saves still succeed	FR-111, CON-13			
REG-NET-05	Simulated read failure	1. Trigger a load error	An actionable message with retry; **a save is never failed for being offline**	FR-111			

REG-INT — Interrupts and configuration changes (5)

ID	Pre	Steps	Expected	Req	A	B	Bug
REG-INT-01	Quick add, amount and note typed	1. Rotate the device	The typed data survives; no crash	CON-13			
REG-INT-02	Quick add, data typed	1. Trigger an incoming call or notification → 2. Return to the app	The entered data is intact	CON-13			
REG-INT-03	Quick add, data typed	1. Switch to another app → 2. Switch back	The entered data is intact	CON-13			
REG-INT-04	Dashboard	1. Switch the system theme light ↔ dark	The app follows the system theme; nothing illegible	FR-118			
REG-INT-05	Dashboard, quick add	1. Set font scale 1.3 → 2. Use a screen ≤ 5"	No money figure is truncated or clipped	NFR-15			

REG-INST — Installation and release build (5)

ID	Pre	Steps	Expected	Req	A	B	Bug
REG-INST-01	No app installed	1. Install the release APK → 2. Register → 3. Use the app	Fresh install works end to end	CON-08			
REG-INST-02	v0.3.0-m3 build installed and signed in	1. Install the new build over it → 2. Open	Session and data are kept	CON-08			
REG-INST-03	Signed in	1. Uninstall → 2. Reinstall → 3. Sign in	Data is restored from Firestore	FR-07, A-05			
REG-INST-04	Release APK installed	1. Open More / settings	The debug demo seeder is **absent** in the release build	CON-11			
REG-INST-05	Release APK on a physical device	1. Sign in with Google	Succeeds (needs the release SHA-1 in Firebase, #278)	FR-05			

REG-A11Y — Accessibility (5)

Findings here are usually P2. Summarise them for the PDF (#273).

ID	Pre	Steps	Expected	Req	A	B	Bug
REG-A11Y-01	Dashboard	1. Enable TalkBack → 2. Swipe through every control	Every control, icon buttons included, is announced meaningfully	NFR-15			
REG-A11Y-02	Quick add	1. Navigate the whole save flow with TalkBack only	The entry can be completed without sight	NFR-15			
REG-A11Y-03	Any screen	1. Measure icon buttons and chips	Every touch target is ≥ 48 dp	NFR-15			
REG-A11Y-04	Light and dark theme	1. Check text against its background with a contrast checker	All text ≥ 4.5:1	NFR-15			
REG-A11Y-05	Dashboard, goal, income	1. Set the font scale to 200%	Screens remain usable; no money figure is cut off	NFR-15			

Ownership

Each member runs the groups they did **not** build, so every area gets fresh eyes and every member has commits in this file (#266).

Member	Groups	Cases
PulithThewmika	REG-INC (7), REG-FX (6), REG-INV (5), REG-REC (6), REG-INS (11)	35
Jayaru2003	REG-GOAL (9), REG-STS (6), REG-WID (5), REG-LOCK (6), REG-NET (5), REG-INST (5), REG-A11Y (5)	41
kaveen20030408	REG-AUTH (9), REG-QA (12), REG-TXN (10), REG-NOTIF (4), REG-INT (5)	40

The split keeps builders away from their own work: Jayaru takes the goal, safe-to-spend, widget and app-lock groups, since Pulith built the app lock and goal screens and Kaveen built safe to spend and the widget. One overlap is left on purpose — Pulith has REG-FX, which includes the crypto YTD card he worked on; swap REG-FX with Kaveen if you want it clean.

Swap any other group if you built the feature it covers, and note the swap in the PR.

Pass rate

Fill in once the run is complete; the PDF's testing chapter cites this (#295).
