S5 — Goal setup, adjustment offers and history wireframe

Document	`Docs/wireframes/S5-goal-setup.md`
Issue	EPIC-011 / T4 · Secondary wireframes for M3 screens (#124)
Screens	SCR-40 Goal edit, DLG-05 Goal adjustment offers, SCR-41 Goal history and archive, and the infeasible-goal and no-income states of SCR-13 Goal (`Docs/ux/screens.md`)
Fidelity	Low: boxes and labels only. Visual polish is M4.
Failure causes from	`Docs/Scenario analysis.md` (rows `A-xx`)
Index	`Docs/wireframes/failure-causes.md`
Builds on	S3-goal-detail.md, which holds the main SCR-13 wireframe, the what-if control and the empty states

Job of the screens. Let the user set a goal in one short form and see at once what it needs each month (A-19). When the goal asks for more than he can realistically save (infeasible, BR-10), say so calmly, show the gap and offer a new deadline or a lower target instead of a permanent "behind" (A-24). Until income exists the goal makes no judgement at all.

Legend: `[n]` is a callout that matches the annotation table below. Dates are DD/MM/YYYY (NFR-20). Amounts are drawn as whole rupees to keep the frames readable; the app formats them as `LKR 1,000.50` (NFR-20, BR-02), see §10. Today is 07/10/2026. Status is a neutral chip, never a red alarm (NFR-14, NFR-16).

1. Wireframe — SCR-40 Goal edit (create and edit)

Figma wireframe: SCR-40 Goal edit

The preview in [1] recalculates as any field changes (FR-76). Nothing is stored until Save.

Edit variant

```
+---------------------------------------------+
| < Edit goal                                 |
+---------------------------------------------+
| ... same fields, prefilled ...              |
| [2] Changing the target or deadline keeps   |
| your progress and logs the old value.       |
+---------------------------------------------+
```

Prefilled from an offer

```
+---------------------------------------------+
| < Edit goal                                 |
+---------------------------------------------+
| Goal name      [ MacBook Pro M4         ]   |
| Target (LKR)   [ 490,000                ]   |
| Deadline       [ 07/10/2027        (cal) ]  |
|                 Suggested                   |
| ... preview: Required 39,900 per month ...  |
+---------------------------------------------+
```

Opened from DLG-05 with the chosen value in place and a small "Suggested" label. The user can still change it before saving.

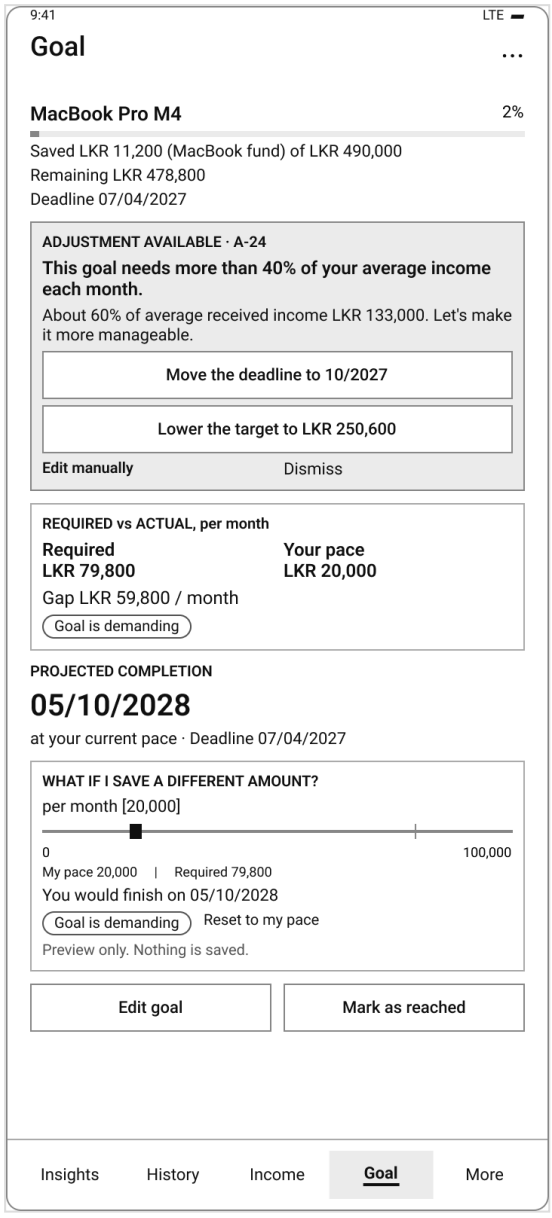

Preview when the goal is infeasible

```
| [1] WHAT THIS NEEDS                         |
| Required per month       LKR 79,800         |
| Your pace                LKR 20,000         |
| ( Needs adjusting )                         |
| That is about 60% of your average income.   |
```

---

2. Wireframe — SCR-13 Goal, infeasible goal variant

The same screen as S3 Frame 1, with a deadline of 07/04/2027. The banner is shown only when the required saving is above 40% of average received income (BR-10).

Figma wireframe: SCR-13 Goal, infeasible goal variant

While the goal is infeasible (BR-10) the chip says "Needs adjusting" and keeps the gap in view. It does not stay on a permanent "Behind". *Dismiss* hides the banner and the chip falls back to the normal status (*ahead*, *on track* or *behind*, BR-09). "Needs adjusting" is the only status that depends on BR-10; it is named so it cannot be confused with the 12-month case, which is within the limit.

3. Wireframe — SCR-13 Goal, before any income

The state a new user sees first. BR-10 runs only once at least one month of received income exists, so there is no banner, no offers and no status chip. The goal still shows what it needs each month, which does not depend on income (BR-06).

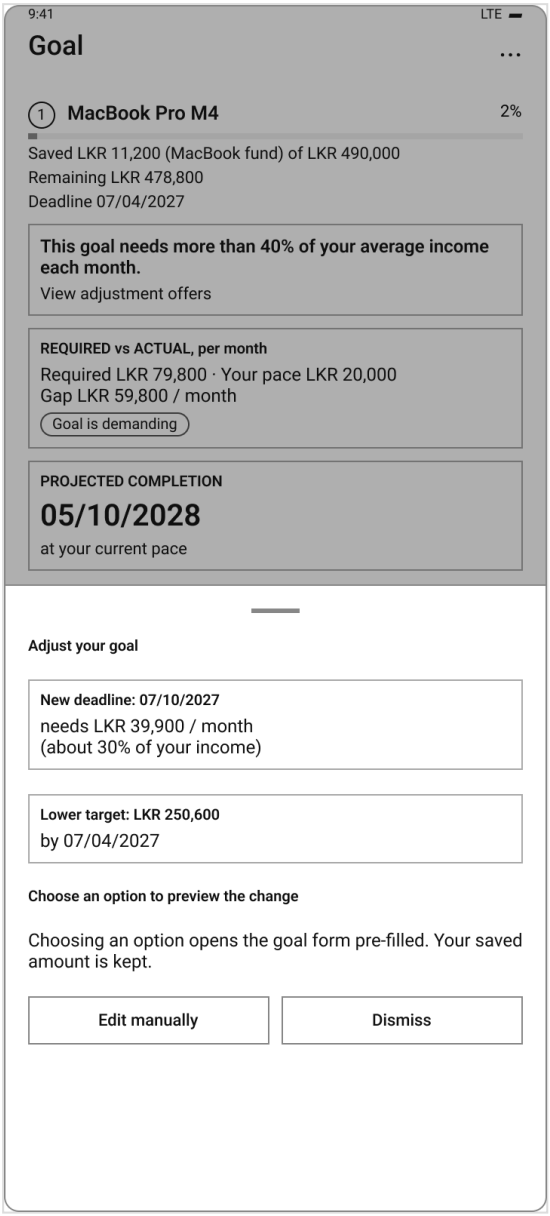

```
+---------------------------------------------+
| Goal                          ( ... )       |
+---------------------------------------------+
| [1] Add your income to see whether this     |
| goal fits. We check it once a month of      |
| income is recorded.                         |
|            [ Record income ]                |
+---------------------------------------------+
| MacBook Pro M4                              |
| [#.........................]  2%            |
| LKR 11,200 of LKR 490,000                   |
| Deadline 07/10/2027                         |
+---------------------------------------------+
| [2] REQUIRED PER MONTH                      |
| LKR 39,900                                  |
| Your pace appears once you have a full      |
| month of entries.                           |
+---------------------------------------------+
| ... rest as S3 Frame 1 and Frame 4 (b) ...  |
+---------------------------------------------+
```

Record income opens SCR-21. In SCR-40 the preview shows the required amount only, with no "% of your average income" line.

---

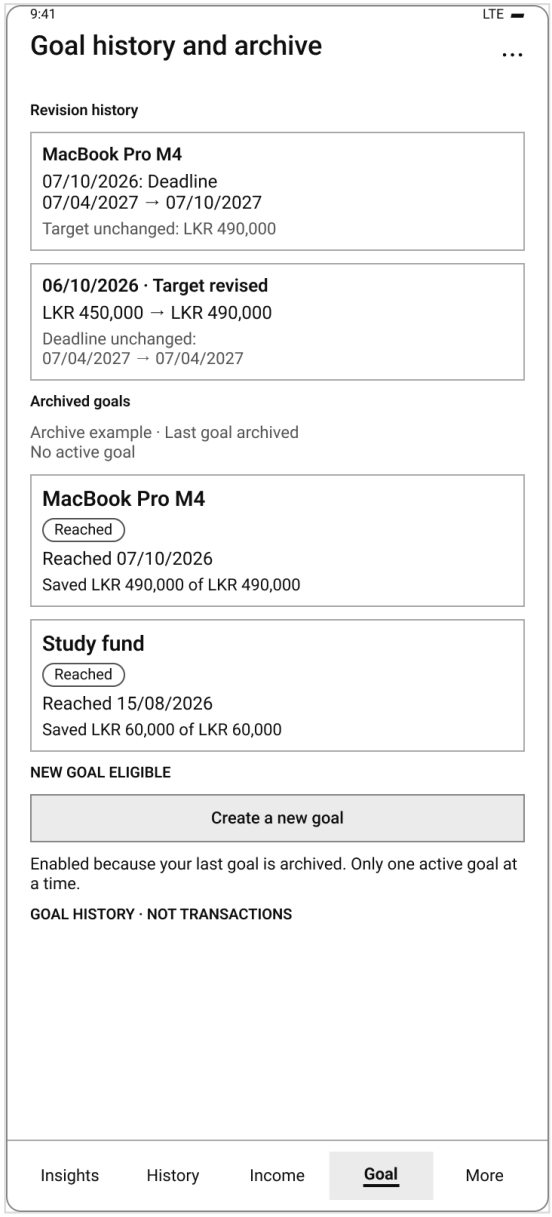

4. Wireframe — DLG-05 Goal adjustment offers

A bottom sheet hosted in the screen (UX-07), shown over a dimmed SCR-13.

Figma wireframe: DLG-05 Goal adjustment offers

5. Wireframe — SCR-41 Goal history and archive

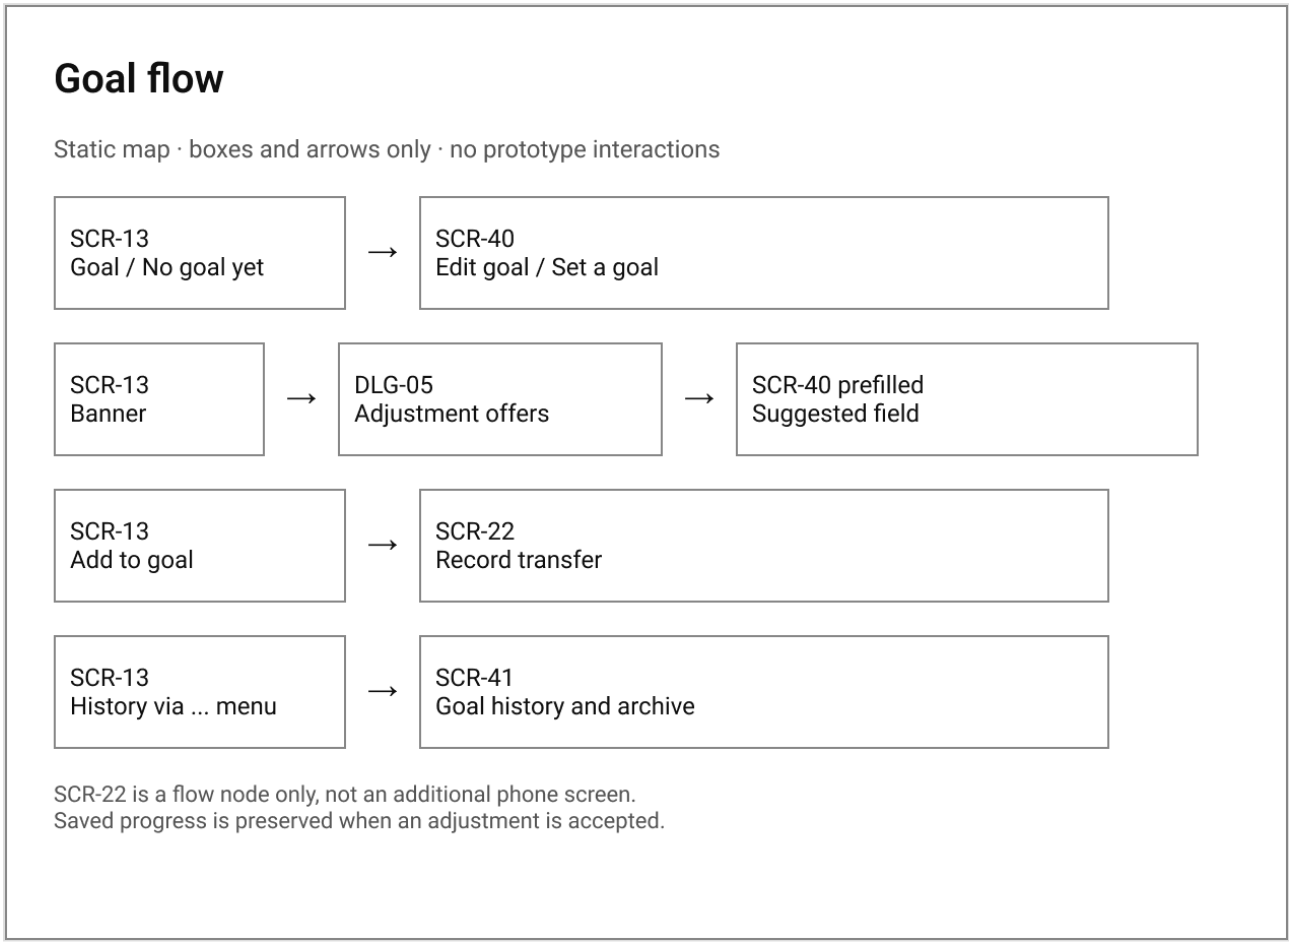

Figma wireframe: SCR-41 Goal history and archive

Empty state

```
+---------------------------------------------+
| < Goal history                              |
+---------------------------------------------+
| No changes yet. Edits to your target or     |
| deadline appear here.                       |
+---------------------------------------------+
```

7. Annotations — the failure each element fixes

Callout	Wireframe element	Cause	Failure cause (from the analysis)	How the element answers it	FRs
SCR-40	Name, target, deadline, linked savings account	A-19	Goal is emotionally present and financially invisible; does not know his savings rate	The goal is a real entity with a number, a date and the account that holds its money.	FR-75, BR-07
SCR-40 [1]	Live "what this needs": required, pace, status, projected date	A-19	Does not know his savings rate	The cost of the goal is visible before it is saved.	FR-76, FR-77, FR-78, FR-79
SCR-40 [1]	Figures are computed, never typed in	A-01	Hand-built formulas broke after row insertions	The user never maintains formulas.	FR-76

Callout	Wireframe element	Cause	Failure cause (from the analysis)	How the element answers it	FRs
SCR-40 [2]	"Keeps your progress and logs the old value"	A-24	The required saving may exceed what he can realistically save	Moving the goal is safe, so he can adjust it instead of abandoning it.	FR-82
SCR-13 [1]	Neutral banner above 40% of income with two offers	A-24	The required saving may exceed what he can realistically save	Detects an infeasible goal, shows the gap and offers a new deadline or target.	FR-81
SCR-13 [2]	Required vs pace with the gap and a "Needs adjusting" chip	A-19, A-24	Does not know his savings rate; required saving may be unrealistic	Required and actual sit side by side and the gap is named, with no permanent alarm.	FR-77, FR-78, FR-81
SCR-13 (no income) [1]	Neutral prompt to record income, no banner or offers	A-03, A-24	After 13 days of diligent entry and a 3-week gap, the incomplete entries felt discouraging, so he never returned; required saving may be unrealistic	A goal with no income data is not judged. The prompt invites the next step and nothing is flagged.	FR-81, FR-106
SCR-13 [3]	Projected date against the deadline	A-19	Goal is financially invisible	The date at the current pace is shown next to the deadline.	FR-79
DLG-05 [1]	New deadline offer	A-24	The required saving may exceed what he can realistically save	Remaining ÷ (30% × average income) months from today (BR-11 a).	FR-81
DLG-05 [2]	Lower target offer	A-24	The required saving may exceed what he can realistically save	Saved + 30% × average income × months (BR-11 b).	FR-81
SCR-41 [1]	Revision history	A-24	The required saving may exceed what he can realistically save	Every change is kept, so adjusting is not hidden or lost.	FR-82
SCR-41 [2]	Archived goals, Create a new goal	A-03	After 13 days of diligent entry and a 3-week gap, the incomplete entries felt discouraging, so he never returned	A reached goal is archived with a neutral label and a new one can start.	FR-84
Whole set	Calm wording, no red	A-23	Impulsive with discretionary spending, optimistic about income, avoidant about expenses	An infeasible goal is a prompt to adjust, not a judgement.	FR-106, NFR-14

Lens 2 shared causes addressed: *no connection to the goal* (SCR-40, SCR-13), *no tolerance for lapses* (SCR-41, DLG-05).

8. Acceptance criteria (issue #124)

Criterion	Where it is met
Low-fi wireframe covering required vs actual (A-19)	SCR-40 callout 1, SCR-13 callout 2 (and S3 Frame 1)
Low-fi wireframe covering the projected date	SCR-40 callout 1, SCR-13 callout 3
Low-fi wireframe covering an infeasible goal (A-24)	SCR-13 callouts 1 and 2, DLG-05, SCR-40 prefilled
Goal state before any income (BR-10)	SCR-13 no-income frame
Goal setup and detail screens	SCR-40, SCR-13 variants, DLG-05, SCR-41

9. Arithmetic used

Average received income LKR 133,000 (the scenario income floor). Today is 07/10/2026. Saved is 11,200, so remaining is 478,800. Pace is 20,000.

Figure	Value	Rule
Required, deadline 07/10/2027 (12 months)	478,800 ÷ 12 = 39,900 (30% of income)	BR-06
Gap at that deadline	39,900 − 20,000 = 19,900 per month	BR-09
Required, deadline 07/04/2027 (6 months)	478,800 ÷ 6 = 79,800 (60% of income)	BR-06
Infeasible limit	40% × 133,000 = 53,200, and 79,800 is above it	BR-10
Gap at the tight deadline	79,800 − 20,000 = 59,800 per month	BR-09
Offer (a): new deadline	[478,800 ÷ (30% × 133,000 = 39,900)] = 12 months, giving 07/10/2027	BR-11
Offer (b): lower target	11,200 + 39,900 × 6 = 250,600	BR-11
Projected finish at pace	478,800 ÷ 20,000 = 23.9 months, giving 05/10/2028	BR-09

10. Open points

Point	Detail	Owner action
New status	"Needs adjusting" is a fourth goal status, shown while a goal is infeasible (BR-10). SRS v1.4 adds it to BR-09 and FR-78.	`TODO(M3)` : confirm the label in review.
Pace before income	BR-09 gives *behind* when pace ≤ 0. The no-income frame shows no chip, because BR-10 asks for a neutral prompt.	`TODO(M3)` : confirm that no status is shown until the first month of income exists, and add it to BR-09 if so.
Whole-rupee display	NFR-20 and BR-02 specify two decimals. The frames show whole rupees.	`TODO(M3)` : settle in `failure-causes.md` §4. M4 inherits the choice.
