S1 — Dashboard (Insights) wireframe

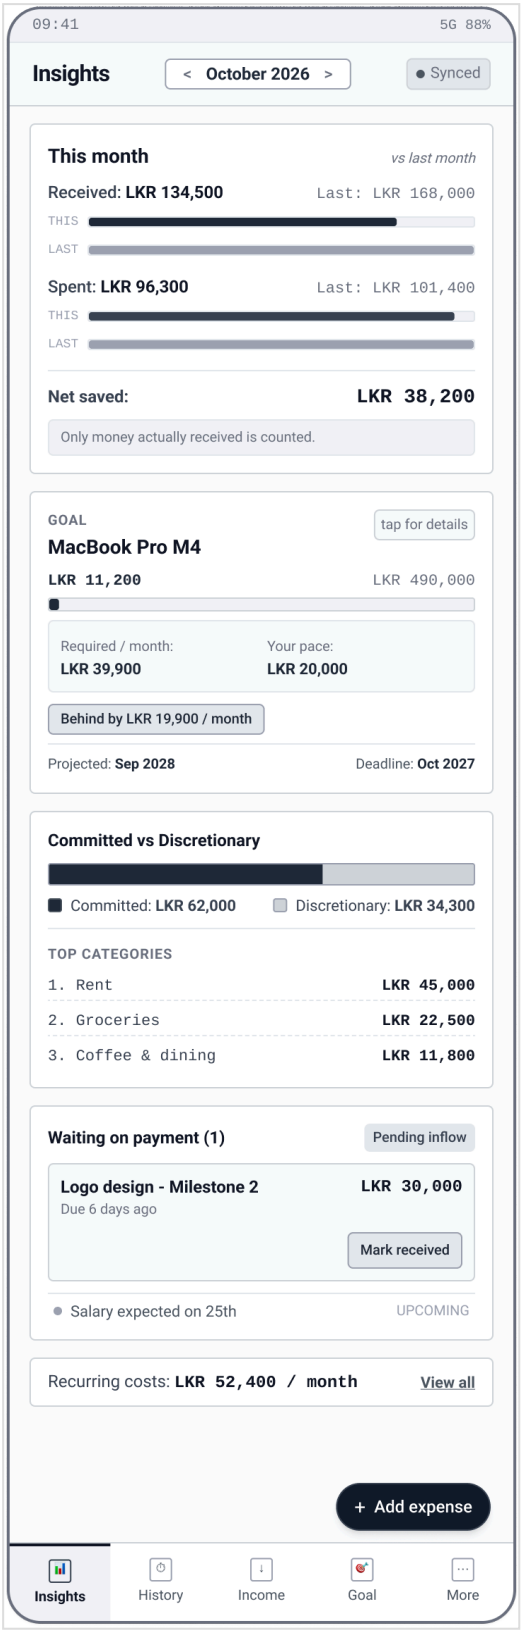

Document	`Docs/wireframes/S1-dashboard.md`
Issue	EPIC-002 / T2 · S1 (#12) · Parent: #11
Screen	SCR-10 Insights (`Docs/ux/screens.md`)
Fidelity	Low: boxes and labels only. Visual polish is M4.
Failure causes from	`Docs/Scenario analysis.md` (rows `A-xx`)
Index	`Docs/wireframes/failure-causes.md`

Job of the screen. Answer "where do I stand?" the moment the app opens (FR-90). Income is irregular, so the comparison that matters is *this month vs last month*, not a budget bar (A-07).

Legend: `[n]` is a callout that matches the annotation table below. Figures are the scenario figures and appear only in documentation (CON-15). Dates are DD/MM/YYYY (NFR-20).

---

1. Wireframe — populated

Figma wireframe: SCR-10 Insights, populated

Offline variant

While the device has no connection, one app-wide banner sits under the top bar (FR-110). It is part of the main scaffold, so the screen itself handles nothing extra. Everything below it is unchanged, and the banner uses neutral wording and no error colour (NFR-14). It hides again when the device is back online.

```
+---------------------------------------------+
| Insights   < October 2026 >                 |
+---------------------------------------------+
| You're offline                              |
+---------------------------------------------+
| [1] THIS MONTH vs LAST MONTH                |
| ... (rest of the screen unchanged)          |
```

---

2. Wireframe — empty state (new account, no data)

```
+---------------------------------------------+
| Insights   < October 2026 >                 |
+---------------------------------------------+
| THIS MONTH                                  |
| Nothing recorded this month yet.            |
| Your totals appear here as soon as you      |
| add something.                              |
+---------------------------------------------+
| GOAL                                        |
| Set a goal to see what you need to          |
| save each month.                            |

```

Rules for this state: neutral copy only. No red, no error, no "incomplete" or "failed" wording (FR-97, FR-106, NFR-14). After 7 or more days without an entry a one-line welcome-back banner sits above callout 1 with a one-tap action to catch-up entry (FR-105).

---

3. Annotations — the failure each element fixes

Callout	Wireframe element	Cause	Failure cause (from the analysis)	How the element answers it	FRs
1	This month vs last month: received, spent, saved	A-07	Assumed a fixed monthly budget	Irregular income makes "this month vs last month" the useful comparison. There is no budget limit line.	FR-91, FR-98

Callout	Wireframe element	Cause	Failure cause (from the analysis)	How the element answers it	FRs
1	"Received" counts money that has arrived	A-16	Needs four apps to compute income; estimate of LKR 160,000–210,000 never validated	One computed figure from received entries only.	FR-57, FR-58
1	Caption "Only money actually received counts"	A-23	Impulsive with discretionary spending, optimistic about income, avoidant about expenses	Totals use received income only, in a neutral tone.	FR-56
1	Figures change the moment an entry is saved	A-09	Data went in, but no insight came out	Summaries update instantly after each entry, from the first entry onward.	FR-91, FR-96
1	Totals exclude transfers	A-21	Cash withdrawals, a secondary account and Binance move money between his own pots	Transfers are a separate type and never counted as income or expense.	FR-61
2	Goal progress card, required vs pace, projected date	A-19	Goal is emotionally present and financially invisible; does not know his savings rate	Goal progress sits on the home screen, with required saving, actual saving and status.	FR-92, FR-76, FR-77, FR-78, FR-79
3	Committed vs discretionary split and ranked categories	A-18	No category system; no idea of discretionary vs committed; shocked by LKR 24,000 on coffee and dining	The split view and a ranked breakdown make the pattern visible without effort.	FR-93, FR-94
4	"Waiting on payment": overdue invoice with "Mark received"	A-13	Forgot to chase invoices (twice); could not match payments to projects	Overdue milestones are surfaced with a one-tap action.	FR-99, FR-51
4	Expected salary shown apart from received	A-12	Cannot recall the exact salary deposited; bonus varies	Expected and received are kept separate. Confirming records the actual amount.	FR-99, FR-49
5	Recurring costs summary, "View all"	A-17	Fragmented spending; gym auto-debit; two subscriptions meant to be cancelled	One visible number for recurring costs, linked to the full list.	FR-95
6	"+ Add expense" FAB	A-02	Data-entry overhead exceeded his willingness	Quick-add is one tap from the first screen.	FR-30
Top bar	App-wide offline banner (shown only while offline)	A-05	No cloud synchronisation	Connectivity is shown once, app-wide; entry and totals work the same offline and sync later.	FR-110, FR-39
Empty state	Calm placeholders and "Add your first expense"	A-03	After 13 days of diligent entry and a 3-week gap, the incomplete entries felt discouraging, so he never returned	The dashboard is useful with partial data and never shows an "incomplete" or "failed" state.	FR-97, FR-105, FR-106, FR-112

Callout	Wireframe element	Cause	Failure cause (from the analysis)	How the element answers it	FRs
Whole screen	One calm screen, nothing to set up first	A-20	Every tool was too unpleasant to open daily	The first screen answers "where do I stand?" without effort.	FR-90

Lens 2 shared causes addressed: *no insight in return for effort* (callouts 1, 3), *no connection to the goal* (callout 2), *no tolerance for lapses* (empty state).

---

4. Acceptance criteria (issue #12)

Criterion	Where it is met
Shows this month's actual income vs spend	Callout 1, with last month beside each figure
Shows goal progress and the projected completion date	Callout 2
Shows the committed vs discretionary split	Callout 3
Shows overdue invoices	Callout 4
Includes an empty state	Section 2
Note: compare this month with last month, not a budget bar	Callout 1, no limit line

5. Arithmetic used

Figure	Value	Rule
Saved this month	134,500 − 96,300 = 38,200	BR-05
Required per month	(490,000 − 11,200) ÷ 12 = 39,900	BR-06
Gap	39,900 − 20,000 = 19,900 per month	BR-09
Projected finish at 20,000 per month	478,800 ÷ 20,000 = 23.9 months, from 07/10/2026 gives 05/10/2028	BR-09
Committed + discretionary	62,000 + 34,300 = 96,300 = spent	BR-13
